Testimony from the Director of the Atanásio Gomes School, one of the PNAD pilot schools

Today, September 7th, Digital Learning Week ends, established by @unesco, with the aim of inspiring all countries in the world to develop and share good digital learning practices.

Therefore, on this last day of Digital Learning Week, we highlight all teachers who, with the National Digital Learning Program (PNAD), want to take their students further, through innovative teaching methodologies, blended learning and the development of digital literacy skills, thus contributing to the achievement of the Sustainable Development Goals in São Tomé and Príncipe.

These teachers are true agents of change in their classes, in their schools and in their communities.

We share the testimony of Professor Izabel Almeida, Director of Escola Básica Atanásio Gomes, one of the PNAD pilot schools, where the Akelius and Learning Passport platforms are already implemented.

In the 2023/2024 academic year, teacher training will be reinforced within the scope of the PNAD, through a structured training course validated by the Office of Continuous and In-Service Training.

Teacher training is one of the factors that most contributes to students' learning and academic success.

May Digital Learning Week kick off an excellent academic year, full of achievements and overcoming!

PNAD is a Program of the Ministry of Education, Culture and Sciences - São Tomé and Príncipe, supported by UNICEF São Tomé and Príncipe.
