## Education for every child

Education is changing and Cape Verde is implementing the recommendations from the Education Summit *Transforming Education*, which urges countries to change the way learning is being done so that Sustainable Development Goal (SDG) 4 is achieved.

And for this transformation, new technologies are your allies.

At the Santa Maria Educational Complex - CEMAM -, on the island of Sal, 350 students, from the 5th and 6th years, begin learning English and French, thanks to the partnership between #UNICEF and the AKELIUS Foundation and the coordination of the Ministry of Education in Cape Verde, with technical support from NOSi.
